

FibreGRATING

Product Description

Combining unmatched corrosion resistance with strength, long life and safety. FibreGRATING sets the standard for fibreglass reinforced plastic (FRP Grating) moulded products. With more than ten custom resins, FibreGrid products are proven to deliver years of reliable service, even in the most demanding corrosive conditions - conditions which cause conventional metallic and wood products to deteriorate rapidly.

FibreGRATING is lightweight and easy to fabricate. Savings on labour and equipment often make the total installed cost of fibergrate products comparable to that of steel.

Combining these installation savings with low maintenance, long life and worker safety, FibreGRATING offers a life cycle cost that is significantly lower than that of products.

System Benefits

- Excellent strength to weight ratio
- Extremely hard wearing and durable
- Lightweight
- Corrosion Resistant
- Easy to handle and install
- Excellent resistance to acidic compounds
- Low maintenance cost
- Long effective service life
- Rapid installation

Depths Available

12mm, 14mm, 25mm, 30mm, 38mm, 50mm

Colours Available

- Green (RAL 6010)
- Light Grey (RAL 7047)
- Yellow (RAL 1003)
