

FibreWALK

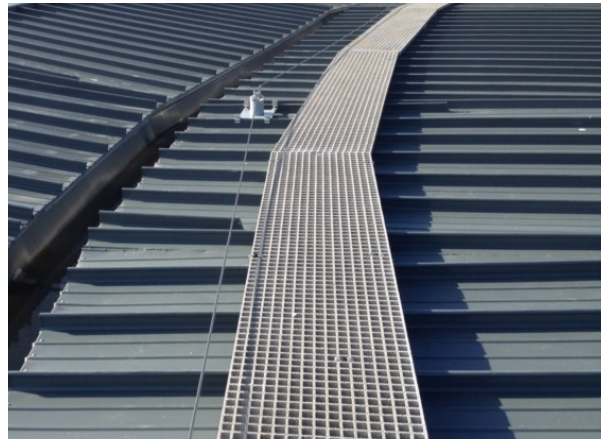

Product Description

Bespoke Roof Walkway Solutions By The Experts

FibreGrid GRP roof walkway grating (FibreWALK) provides an anti-slip, level, walking surface across roofs as well as a demarcation route which protects the roofs surface from unnecessary foot traffic and potential damage.

In potentially highly trafficked areas of roofing, where regular access may be required for maintenance regimes GRP Roof Walkway Systems distributes the load evenly on the roof and thus reduces wear and tear on the roofing system itself.

Each section of the walkway is manufactured in glass reinforced plastic with enhanced slip resistance for adverse weather conditions.

System Benefits

- System designed and manufactured in the UK
- Excellent strength to weight ratio
- Extremely hard wearing and durable
- Lightweight
- Corrosion Resistant
- Easy to handle and install
- Low maintenance cost
- Long effective service life
- Rapid installation

Roof Types

Composite, Standing Seam, Metal, Flat, Single Ply

Colours Available

- Green (RAL 6010)
- Light Grey (RAL 7047)
- Yellow (RAL 1003)
